

# **Saadi Food** Products Catalogue

# **Company Introduction**

Saadi is a well-trusted family-owned private company since 2005.

We have recognized as one of the key supporters the dried fruits such as raisins, dates and saffron industry in the Middle East and is ISO 22000 certified.

Saadi as part of our responsibility and commitments, we design safety and sustainability into our products and manufacturing processes. handpick products are going to be harvested at their best. Each Saadi supplied product goes through multiple stages of quality checks and ensures that only the best ones are available for end consumers. We maintain fully automated plants and factories with proper quality control systems completely complying with GFSI standards. We are taking every precaution that the quality of our goods to be maintained as FIRST-CLASS.

We handpick our raw-materials from our network from local farmers, eventually selecting each item, always ensuring consistent and premium quality.

We take our clients' need seriously and happily adjust our sourcing, delivery and selection to suit your specific business needs.

## **Why Saadi?**

Saadi is one of the oldest and most reputable producers and exporters of Dried fruits. This company is able to supply merchants and businessmen with any amount of tonnage in all seasons and the latest products.

We allow our customers to design their desired packaging based on market demand, rules and regulations. The commitment of the company is based on permanent and constant quality of products.

We guarantee the safety and quality of our products according to the latest standards and terms with the best equipment and high-tech machines.

We guarantee Aflatoxin-free and pesticide-free products. We will be more than an exporter for you, we will be your consultant.

# Chief Executive Officer Message

We believe that the customers of any organization are the biggest capital of that organization. Therefore, all the efforts of the staff of Saadi Group are focused on meeting the needs of customers, and the main factor of our success in the last few years has been identifying and meeting the basic needs and expectations of our buyers. We wish to be your good consultant hopefully.

# **Organizational Values**

Providing the best services to customers and unlimited support is one of our most important organizational values. Therefore, our experienced sales team is ready to respond and provide the best services to customers 24 hours a day.

# **Mission**

Saadi is a pioneer and active in the field of production and export of quality Dried fruits. We are a mission-based company which our purpose is to set high standards consistent with global markets and secure product supply and delivery, thereby satisfying buyers.

## **Scope**

---

Becoming the popular supplier of buyers in the Dried fruits industry.

# **Shipping Terms**

Our usual shipping is "maritime transport" (by sea). Air transportation, courier, parcel post are also possible if requested.

## **Packing**

We supply our products as 10 kg or 5 kg bulk packages as carton and wholesale. In order to maintain the safety of the goods during the journey and shipping, we use three-layer or five-layer cartons, in addition, we share the cartons to ensure that the goods will reach the customers in acceptable safety.

Also, we allow customers to design their packaging according to their interest, print their name, logo, address or anything else according to their needs.

Our company's general policy has been observed the ethical principles of customer orientation and the principles of quality assurance in all products and keep pace with global developments in the field of food product packaging.

## **Payment Terms**

Saadi company has always prioritized the reliability and peace of mind of buyers on its agenda. Therefore, it has easy and flexible payment terms.

The payments are usually made in such a way that first of all the buyers arrange their order with the sales manager and pay 50% of the sales amount as an prepayment against the proforma invoice and the remaining 50% shall be paid according to the draft bill of lading. As well as, we can use credible inspection company such as SGS and BV, if buyers requested.

# **Headquarter Of the Company**

Due to the logistical situation and the location of the world's largest grove in Iran, we established our headquarter in this country, so your orders will be delivered without intermediaries and as soon as possible. We also have offices abroad to provide the best services and facilitate bank transfers.

## **Products Safety**

Saadi's production standard is in accordance with the latest national food industry standards of Iran and the world. To ensure the permanent application of these standards, all Saadi employees have received the necessary trainings and each of them takes the necessary care to maintain the quality principles of production.

In addition, the quality control unit which is managed by experienced specialists in the fields of chemistry, food industry, and nutrition, continuously monitors all production phases. Even the quality control unit controls and supervises the post-production phases, including storage, loading and transportation, so that Saadi products reach the consumer in the safer and best possible states. Quality control has been done at every step of the process by checking the moisture level, uniformity in colors and sizes.

The environment of the date production and packaging workshop is striled with Ethanol and the sanitary affairs of this workshop are based on the quality certificate of the German TUV company and fully approved by the sensitive and strict Japanese customers, which shows that the production management, quality control and marketing are integrated.

# Products

# Products

## Raisins

Raisins, a naturally nutritious snack, are a good source of vitamins and minerals. Low in cholesterol and sodium, high in fiber, and very low in fat, they provide a quick energy boost due to their 70% fructose content, making them a good source of instant energy.

Types of Raisins and their processing methods

# Products

## Sultana Raisins

Sultana raisins are among the most popular types of raisins worldwide, especially in Europe. They are commonly enjoyed as a healthy snack. This variety typically comes in two colors: light brown (Malayer type) and dark brown (acid-treated type).

The production process begins with dipping the grapes in a food-grade alkaline solution, followed by sun-drying under direct sunlight. This method reduces moisture content, lowers acidity, and helps preserve the nutritional value of the final product.

# Products

## Golden Raisins

Golden raisins, widely recognized as a symbol of Iranian dried fruits, are amber-yellow in color, seedless, and known for their pleasant flavor. They are produced from high-quality seedless grape varieties. During the production process, the grapes are first exposed to sulfur smoke, which helps evaporate their internal moisture. They are then fully dried in shaded environments.

This specific drying method compresses the texture of the raisins and preserves their natural sugars, resulting in a denser consistency and a noticeably sweeter taste.

# Products

## Green Raisins

Green raisins, naturally green in color, are mainly produced in Kashmar, a city located in the northeast of Iran.

The processing of this type of raisin involves drying the grapes naturally in the shade, which helps preserve their green color. For this reason, these raisins are considered one of the most natural varieties.

Additionally, upon customer request, these raisins can be treated with sulfur to turn into a golden yellow color.

# **Products**

## **Advanced Processing Technology**

The Saadi Company's sorting tunnels include three color sorters, one laser device, and one X-ray sorter. Each raisin grain is inspected multiple times as it passes through these tunnels, and its path is adjusted accordingly. Finally, the finished product is checked by a metal detector and thoroughly inspected from all aspects.

By utilizing cutting-edge laser and X-ray sorting technologies, Saadi Company is capable of producing and packaging between 60 to 100 tons of raisins daily. This capability places the company in a superior position compared to competitors in terms of quality, processing speed, and delivery time.

# Products

## Saffron

Saffron is a plant from the family of lilies and is the most expensive spice in the world. From the middle of the leaves, a long stem emerges from this plant, which leads to one or three flowers. The flowers have 6 purple petals. The flowers have 3 stamens and a pistil leading to a three-branched red-orange stigma.

The used part of this plant is the end of the cream and stigma of three branches, which is known as saffron and is fragrant and slightly bitter.

Saffron is invigorating and pharmaceutical companies use it as an anti-depressant.

Crocin and safranal in saffron have the same effect as antidepressants.

Crocin is the compound that is responsible for the coloring of saffron.

Picrocrocin has a bitter taste, which is mostly responsible for the taste of saffron.

The aromatic smell of saffron is due to the presence of safranal.

# Products

## Saffron

Saffron, known as the red gold, is another valuable product from Saadi Company's farms. This product is cultivated, harvested, and processed in the company's factories, and is offered in beautiful and diverse packaging.

Types of Saadi saffron:

- Super Negin
- Negin
- Poushali (Spanish Style)
- Sargol
